

20 Reasons

why **StorGuard** is
superior to a tape based
backup solution

1. Small and single file located and restored in seconds
2. No software or agents are installed on servers or PCs
3. Data stored securely offsite but restored quickly online
4. Fully automated backup eliminates human error
5. IT staff can remotely access StorGuard (securely) to initiate backup and restores
6. Once set-up, StorGuard is totally automatic and will run unattended
7. Laptop can be automatically backed up when attached to your network
8. Daily monitoring service with escalation procedures
9. Permissions can be set to enable individual user restores (if required)
10. Encryption data held on high availability disk arrays with a backup copy on tape
11. Only the compressed data changes (using common file elimination) are backed up
12. Concurrent multiple backup and restore permitted
13. Fully scalable, with future proof infrastructure
14. Pay as you grow: Only pay for what you use and when you use it
15. Data is transferred offsite immediately
16. Internet connectivity available
17. Built in data disaster recovery (with annual test invocations available)
18. Forms part of an overall business continuity plan
19. Total backup service is covered by a comprehensive SLA
20. StorGuard is a gateway for future online services
